Eastern promise as EEAP celebrates first Mifed

By Liza Foreman

EASTERN EUROPEAN ACQUISITIONS Pool is celebrating one year in business. The Berlin-based company, which specialises in acquisitions for the eastern European market, has acquired more than 20 films for the region. "Our intention is to increase the number for next year to around 30 titles," said md,

Alexander van Dulmen. "It was definitely a good idea to partner with AQS."

According to van Dulmen, the region is growing in size and stability. "The only place we have recognised any serious problems is Poland," he said. "So-called under-screened territories, such as Russia and Croatia, are getting more screens, plus you have

the expansion of the TV market."

Russia, said van Dulmen, has grown immensely, fetching almost as much money as Germany. "People are paying remarkable prices for Russia," he said. "Every time you go to a booth, Russia is already sold. People are starting to ask crazy money for Russia. But it's suicide. It doesn't work like that."
